# Contents Volume 31 (2000)

*Research Papers*

Numerical simulations of pendant ice formations
K. Szilder and E.P. Lozowski . . . . . 1

Freezing behavior of freely suspended industrial wastewater droplets
W. Gao, D.W. Smith and D.C. Sego . . . . . 13

On changing trends of $\delta D$ during seawater freezing and evaporation
Y. Wang, X. Chen, G. Meng, S. Wang and Z. Wang . . . . . 27

Field measurements of in-ice radiance
W.S. Pegau and J.R.V. Zaneveld . . . . . 33

Theory of water transport in melting snow with a moving surface
S. Sellers . . . . . 47

Mathematical modelling of monotonic and cyclic behaviour of fresh water columnar grained S-2 ice
A. Derradji-Aouat, N.K. Sinha and E. Evgin . . . . . 59

A method for sectioning natural snow/pavement samples
S. Borel and J.B. Brzoska . . . . . 83

*Research Papers*

Complexities of avalanche forecasting in Western Himalaya — an overview
S.S. Sharma and A. Ganju . . . . . 95

Dislocation motion around loaded notches in ice single-crystals
D. Cullen, X. Hu, I. Baker and M. Dudley . . . . . 103

Coagulation of suspended sediments and ice crystals below leads
K.J. Eidsvik . . . . . 119

Application of statistical and hydraulic-continuum dense-snow avalanche models to five real European sites
M. Barbolini, U. Gruber, C.J. Keylock, M. Naaim and F. Savi . . . . . 133

Stone movements and permeability changes in till caused by freezing and thawing
P. Viklander and D. Eigenbrod . . . . . 151

Size distributions of small ice pieces calved from icebergs
S.B. Savage, G.B. Crocker, M. Sayed and T. Carrieres . . . . . 163

*Addendum*

Addendum to "Computational modelling of frost heave induced soil-pipeline interaction I. Modelling of frost heave" [Cold Regions Science and Technology 29 (1999) 215–228]
A.P.S. Selvadurai, J. Hu and I. Konuk . . . . . 173

Addendum to "Computational modelling of frost heave induced soil-pipeline interaction II. Modelling of experiments at the Caen Test Facility" [Cold Regions Science and Technology 29 (1999) 229–257]
A.P.S. Selvadurai, J. Hu and I. Konuk . . . . . 174

*Research Papers*

Elastic visco-plastic analysis for earthquake response of tunnels in cold regions
Y. Lai, Z. Wu, Y. Zhu and L. Zhu . . . . . 175

Natural gas and gas hydrate accumulations within permafrost in Russia
V.S. Yakushev and E.M. Chuvilin . . . . . 189

The coupled heat-moisture-mechanic model of the frozen soil
N. Li, B. Chen, F. Chen and X. Xu . . . . . 199
Magnetic resonance imaging of sea-ice pore fluids: methods and thermal evolution of pore microstructure
H. Eicken, C. Bock, R. Wittig, H. Miller and H.-O. Poertner . . . . . 207
Analytical viscoelastic solution for frost force in cold-region tunnels
Y. Lai, W. Hui, W. Ziwang, L. Songyu and D. Xuejun . . . . . 227
Observations and simulations of the formation of the faceted snow crystals in the weak-layer of the 1998 Niseko Haru no Taki avalanche
J. McElwaine, A. Hachikubo, M. Nemoto, T. Kaihara, T. Yamada and K. Nishimura . . . . . 235
